

Extreme Adventure Ltd – Risk Assessment

Activity- Land Zorbs

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Injury from multiple clients in the same Zorb	Clients	Only one person per Zorb is allowed. Anyone ignoring this rule is removed from the activity	Severity of Risk (S)- 3 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 3 LOW	Staff to be vigilant	Ongoing
Injury caused by Zorb rolling out of control	Clients & Spectators	Zorb only operated within the confines of an inflatable track	Severity of Risk (S)- 3 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 3 LOW	Staff to be vigilant	Ongoing
Client hit by an object from their pocket such as mobile phone	Clients	All clients instructed to remove all the contents of their pockets before entering the Zorb	Severity of Risk (S)- 1 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 1 LOW	Staff to check	Ongoing
Client chokes from eating whilst in Zorb	Clients	All clients are instructed to remove any food or chewing gum before they enter the Zorb	Severity of Risk (S)- 3 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 3 LOW	Staff to check no one is eating or chewing whilst participating on the activity	Ongoing

What are the Hazards which cause:	Who/what may be harmed? (give specific of people e.g. staff, visitors, users or contractors)	What is done now? (i.e. .provision of training, corporate and local standards, codes of safe working practice, supervision, monitoring systems)	What is the rate of Risk? (Rate risk as Low, Medium or High)	What action needs to be taken? (the needs to be considered in that the risks are identified and effectively controlled)	By when? (what is the target date for completion)
Loose footwear hitting client whilst rolling in Zorb	Clients	All clients are asked to remove shoes before entering activity	Severity of Risk (S)- 1 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 1 LOW	Staff to check all footwear removed	Ongoing
Over exertion	Clients	Clients are given a short safety briefing. Also Staff are instructed to watch for the Zorb becoming fogged up as this can be a sign of over exertion	Severity of Risk (S)- 3 Likelihood of Risk (L)- 1 Overall Risk (S x L)= 3 LOW	Staff to be vigilant	Ongoing

Calculation of Risk Evaluation

Severity (S)

Severity of Risk is judged by evaluating the effects of the hazard if the risk occurs.

This is evaluated as Minor = 1, Major = 2, Serious = 3

Risk Likelihood (L)

The likelihood of the harm occurring is evaluated on the following basis:

Unlikely =1, Possible = 2, Likely = 3

Overall Risk

Overall Risk is calculated by multiplying the figure for Severity (S) x Likelihood (L). The figure calculated is related to the rate of risk as follows

1 to 3 Low, 4 to 6 Medium, 7 to 9 High

Circulation	Management, Staff & Show or Event Organisers
Assessor	Andrew Caldwell
Date Assessed	3 rd November 2016
Review Date	Every 12 months next review 3/11/201
